/* WARNING
* WARNING: this community-contributed template is not fit for production
use as it performs a complete db-scan with every invocation
* WARNING
*/
// Parameters:
//   title: The title text
//   Path:  pathe to the starting page
//   max:   Maximum number of items to list
//   depth: The level of sub page to evaluate
//   reverse: Reverse to sort order
//   blockstyle: Any valid in-line styles. Affects container that wraps
entire template
//   titlestyle: Any valid in-line styles. Affects the title section
//   bodystyle:  Any valid in-line styles. Affects the body section
/*
  In a dekiscript block:
    WhatsPopular{ title: 'My Popular Pages',
                  path: '/resources',
                  max: 5,
                  depth: 2,
                  reverse: true,
                };
Version History: 1.0 - Initial release
                  1.0.a - Changed from using div id's to div classes
                  1.1 - (neilw) Changed to using @pageid to find the pages
from wiki.tree()
                  2.0 - Redesign: flex rows, right-aligned view badges,
hover
