```
/***

    USAGE:

    FeaturedPages
        shows a table of pages by popularity, rating, creation, and
updates.

    PARAMETERS:

    (optional) description : str
        description of featured pages; default: nothing

    (optional) pages : list
        list of page objects to use; default: subpages of invoking page

    (optional) id : str
        dom id used for table; default: none

    (optional) missing : xml
        placeholder text when no pages were found

    (optional) limit : num
        max number of articles to show in each section; default: 15
***/

var description = $0 ?? $description;
var pages = $1 ?? $pages ?? map.values(page.subpages);
var id = $2 ?? $id;
var missing = $3 ?? $missing;
var limit = $4 ?? $limit ?? 15;
